

Political opinion polls in Belgium in 1991

by Erwin DAS,

Research assistant at the Section of Political Sociology of the Catholic University of Leuven

This annual review (since 1974) of political opinion polls in Belgium is classified according to the major policy sectors: foreign policy, social policy, economic policy, financial policy, domestic policy, and cultural policy. Polls that have little or nothing to do with politics as such are placed under the heading "other polls".

In the inventory, the title of each poll is given along with the main keywords, the institute that conducted the poll, the time of the polling, the size of the sample, the sponsor, and the bibliographical data of its publication. An X stands for confidential or unknown.

This inventory was compiled on the basis of the information provided by the "Steunpunt Sociopolitiek Systeem" at the University of Gent, for which we express our sincere appreciation.¹
